Noveleta, Cavite

PROFESSIONAL SUMMARY

Full Stack Software Developer proficient in JavaScript, PHP, and full-stack architecture. Skilled in developing responsive applications and reliable backend systems that streamline processes, improve system performance, and enhance user productivity.

WORK EXPERIENCE

Full Stack Software Developer | H.R.D. Singapore Pte. Ltd.

General Trias, Cavite | December 2023 – July 2026

- Built and maintained internal web systems that streamlined workflows and reduced manual tasks across multiple departments.
- Translated user requirements into functional system features, helping teams complete tasks more efficiently and with fewer errors.
- Developed and improved front-end and back-end components to enhance performance, maintain system stability, and ensure accurate data processing.

Technical Support Intern | City Government of Cavite

Cavite City, Cavite | July 2022 – September 2022

- Resolved computer and printer issues to reduce downtime and support daily office operations.
- Maintained and organized resident data, improving accuracy and making records easier to access.
- Assisted with IT operations and used basic Python scripting to support simple data processing tasks.

NOTABLE PROJECTS

HRD Production File Management System

Technologies: HTML, CSS, JavaScript, Vue.js, Vue 3, Node.js, & CouchDB

- Designed and developed a full-stack application to modernize prefabrication workflows through secure file exchange.
- Engineered a high-performance Node.js backend that securely stores house plans and enables fast data retrieval.
- Created a user-friendly Vue 3 interface that simplified file uploads and improved usability for internal users.

Undergraduate Thesis: Management Information System for Barangay Salcedo 1

Technologies: HTML, CSS, JavaScript, PHP, & MySQL (phpMyAdmin)

- Digitized manual record-keeping with a centralized system to significantly reduce document processing time.
- Developed a secure MySQL database to improve data accuracy and allow quick access to resident records.
- Built a responsive interface that streamlined certificate processing and improved service delivery.

TECHNICAL SKILLS

- **Languages:** HTML5, CSS3, JavaScript, TypeScript, PHP, C#, Visual Basic, C++, Python
- **Frameworks & Libraries:** Vue.js, Vuetify, React.js, jQuery, Node.js, Laravel, .NET
- **Databases:** CouchDB, SQL, MySQL
- **Core Competencies:** RESTful APIs, Component-Based Architecture, Server-Side Logic, Data Optimization

EDUCATION

Bachelor of Science in Computer Science (Cum Laude)

Cavite State University - Cavite City Campus | Cavite City, Cavite

Graduated: 2023

CERTIFICATES & HONORS

- **Certificate of Eligibility for Honor Graduate** – Civil Service Commission Regional Office IV
- **President's Lister and Dean's Lister** – Cavite State University - Cavite City Campus
